

NEWS from the Paranormal Investigators of Milwaukee

October/November 2012

Issue 4

Special points of Interest:

On October 1st Lead Investigator Noah Leigh was a guest on the "Equipped" radio show. Please visit www.parahunter.com to hear the full segment.

PIM has been given a very exciting opportunity to be a part of a documentary about haunted places in Wisconsin. The movie will be called Haunted State and will be released in 2013. While they are filming in Milwaukee PIM will be the paranormal consultants for the HS team.

- Calendar of Events **2**
- PIM's Thanks Giving Reflections **2**
- Recent Investigations/ Library Event Info. **2**

October Happenings

The month of October is certainly a very busy month for the paranormal investigators of Milwaukee. With Halloween right around the corner we are busy with investigations, library events, public events, and much more. We must not forget though, that October is also breast cancer awareness month. Chances are someone you know has been affected by this form of cancer be it friend, family member, or co-worker. Last month PIM participated in the Susan G. Komen race for

the cure. We, along with friends and family, had a great time while raising money for breast cancer research. This is a race that we at PIM will put away our EMF detectors and other gadgets (at least for one day) to participate in annually and "Save the Boooobies!"

Investigators Stephanie, Jann, Gravy, and Noah.

PIM in the News

PIM was recently featured on FOX 6's "Real Milwaukee". Tony Clark came on location to the Amalgamated Transit Union Local 998 building in Milwaukee to learn how we conduct our paranormal investigations. We had the opportunity to show how we debunk claims of activity and how we use and set up our equipment. We had so much fun taping this segment and would like to thank FOX 6 for this wonderful opportunity! Please visit our website to view the video.

PIM was also recently featured in a Two-Part feature for TMJ4 News at the historic Riverside Theatre. PIM was able to show some of the areas where we have captured evidence and some equipment use. PIM would like to thank Stephanie from TMJ4 and Jason from the Riverside Theater. Please visit our website to view the video.

Member Spotlight

Each month we'll highlight a member's story. This month we feature investigator **Missy Bostrom**

Vitals:

Cosmetologist, Wife and Mother of 3.

What is your favorite part of investigating? It's being able to investigate somewhere new and learn something in the process.

Since PIM is Scientifically based do you think science will ever be able to thoroughly prove the paranormal? I think there will always be skeptics that will be hard to convert into believers but I am hopeful that Science will someday prove the existence of spirits.

Equipment Spotlight

Inductive Amplifier

The inductive amplifier is a device that essentially turns EMF into sound. This device was used by telephone companies to trace telephone wires in walls. This is model 200B made by Progressive Electronics.

PIM has modified the device to include an On/Off switch and to increase the gain so the audio is easier to hear. This device is inexpensive and available on Ebay for under \$20. With modifications, the entire cost is less than \$30.

This device is used like a real-time EVP device. There is a theory that spirits communicate via EMF and this device is perfect to test that.

Special thanks to PIM member Randy for modifying this device.

For more information about this device or how to modify one please email Noah via the website.

November

Nov. 7-- Waukesha Library Event 321 W. Wisconsin Ave.

Nov. 2 & 3-- Investigations in West Allis for Paranormal class

Nov. 17-- Private Investigation

As we move on into November we at PIM would like to reflect on the many things we are thankful for. First we are ever thankful for our Families, Friends, and amazing Followers. Without all of you we wouldn't be capable of success. Our success is emulated in our flourishing library events. We are thankful to all the area public libraries for opening their doors to us and giving us the opportunity to teach and share our knowledge about the paranormal. We would not have the good fortune to expand our knowledge without the many investigation opportunities that we receive. Each time we investigate it gives us new awareness of this mysterious field. We spend much time documenting and discovering, debunking and disproving. It's always an opportunity to take away something new and for this we are thankful to all our clients and supporters! There are so many more things that we are thankful for, our team members, our health, our equipment, etc., but one thing is for certain, we will never take for granted the very things that deserve our gratitude.

Recent Investigation News/Library Events

PIM recently returned to Willow Creek Farm in Cherry Grove Township, Illinois. Willow Creek has been featured on A&E's "My Ghost Story" and we had the opportunity to stay and investigate for 2 nights. This location was a very interesting and intriguing place that did not disappoint. Evidence review is still ongoing for this location but PIM hopes to return for further investigation in the future.

Next we visited Ripon College and investigated the West Hall and Library. That same weekend we drove to Fond du Lac to investigate the historic Ramada Inn. We were granted full access of the Inn. It was a busy weekend but certainly worth it! Evidence review is still ongoing for both investigations.

Most recently we investigated the ATU Local 998 in Milwaukee. It was a good opportunity for us and local. We are working on evidence review for the location.

PIM recently had a successful public event at the Four Season's Island Resort in Pembine, WI. It was a fun and fabulous opportunity full of good times, elegance, mystery, great food and an investigation too! Evidence review is still ongoing for this investigation.

PIM offers scientific investigations of suspected paranormal activity in homes, businesses, and historic sites. We pride ourselves on providing confidential, professional services free of charge.

To have PIM conduct an investigation for you, contact Noah Leigh (Lead Investigator) through our website or by the phone number listed above.

We look forward to meeting you at a public event, investigating with you, or just hearing from you on Facebook or Twitter!
