- Equipment Spotlight **2**

Happy Holliday's from PIM

December is finally upon us. The time of year of holiday activities, getting together with friends and family, shopping and gift giving, baking and eating, and of course paranormal investigating. Isn't that how everyone celebrates? Well, even PIM gets together to celebrate this joyous time of year. However or whatever you celebrate, PIM would like you to know that while the Holiday's are exciting and there are many things to do, we always will take the time to think about and appreciate all of our supporters, like you!

Happy Holidays!!!

Looking for an Opportunity to learn more about the paranormal?

PIM's founder, Noah Leigh is holding another round of Paranormal Investigation courses through the West Allis/West Milwaukee Rec Department.

Two levels of courses are offered, the first in January and the second in February. The classes are offered on Wednesday evenings from 6:00-7:30 pm.

The first class starts out with the history of paranormal investigation and then moves into Paranormal 101. The second class picks up from the first and continues with an in-depth look and investigative techniques and equipment use and finishes with an investigation of a location in West Allis

It is recommended that you take Paranormal 101 before you take Paranormal 102.

Member Spotlight:

Each month we'll highlight a member's story. This month we feature investigator **Jann Goldberg**

Jann Goldberg has been with PIM since April 2012. She has various interests with respect to paranormal research and investigation. Her educational background is in anthropology, so as one may imagine, She is very interested in the cultural aspects of paranormal investigation.

Jann's main functions within PIM are research and public relations. What she is focused on as a researcher is trying to find consistencies in environmental conditions when phenomena are experienced. She believes that this will help us pinpoint conditions that are conducive to experiencing paranormal activity. Tracking these conditions was actually her first assignment with PIM; currently her winter project will be reviewing the data and trying to find consistencies.

Jann believes the most fun, while being a part of PIM, is getting to meet our clients and the people who support us. She says "I love doing public library events and public ghost hunts. I am always amazed at what great questions people ask at our library events, and novice investigators always bring such fun and positive energy to our public ghost hunts!"

Her relevant educational background consists of a Bachelor's degree in Anthropology with a focus on archaeology and mortuary ritual. She also has a Certificate in Forensic Death Investigation from the University of Wisconsin-Milwaukee Center for Forensic Science. This certificate encompasses elements of forensic anthropology, and crime scene investigation.

She is married with a 4 year old. She has two dogs and a parrot and will do just about anything for bacon.

Calendar of Events:

November 30th– Private Residence Investigation

December 1st– Private Residence Investigation

December 7th & 8th– Investigation at Tinker Swiss Cottage, Rockford IL.

December 15th– Private Residence Investigation

Equipment Spotlight:

Extech RHT50 DataLogger

This datalogger monitors temperature, humidity, and barometric pressure taking a reading once every minute. At the end of the investigation you simply plug the unit into your computer and download the data to generate a graph of the above parameters over time.

This allows you to correlate any paranormal events with these parameters easily.

Two Night Investigation at Tinker Swiss Cottage

On December 7th PIM will be traveling south to Rockford Illinois to do a two night investigation at the Historic **Tinker Swiss Cottage**. The cottage was originally built by Robert Tinker in 1865. The Tinker family were the sole occupants of the cottage until the death of Robert's second wife in 1942. In 1943 the building along with many original furnishings and personal belongings were left to the Rockford Park District which then opened the home as a museum. Tinker Swiss Cottage was recently featured on Syfy's Ghost Hunters this last October. Now PIM will have the great opportunity to be the first paranormal team to stay a full weekend and have two consecutive nights to investigate! We are extremely excited to see what Tinker Swiss Cottage has in store for us!

Recent Investigation News/Highlights

On October 27th PIM investigated the original Blatz Headquarters in Milwaukee. This was an extremely interesting investigation at a beautiful historic building. We had a few strange occurrences throughout the night but unfortunately no audio or video evidence.

On November 2nd PIM investigated Lincoln Intermediate School in West Allis. We were joined by Noah's West Allis/West Milwaukee Rec. class. The following night we returned and was joined by Noah's UW-Waukesha Continuing Ed. class. These were both great investigations! Both classes did a great job of participating and learning how we conduct ourselves during an investigation from set up to breakdown. PIM would like to thank everyone who participated. If you would like more information on Noah's Paranormal classes please check out the link on Page 1.

Most recently we investigated a Private Business in downtown Milwaukee. This was certainly an exciting investigation with a few great personal experiences! Evidence review is still ongoing for this location so stay tuned.....

PIM offers scientific investigations of suspected paranormal activity in homes, businesses, and historic sites. We pride ourselves on providing confidential, professional services free of charge.

To have PIM conduct an investigation for you, contact Noah Leigh (Lead Investigator) through our website or by the phone number listed above.

We look forward to meeting you at a public event, investigating with you, or just hearing from you on Facebook or Twitter!
